AUDITORS' REPORT

TO THE SHAREHOLDERS OF THE EGYPTIAN GULF BANK (S.A.E)

Report on the Financial Statements

We have audited the accompanying separate financial statements of the Egyptian Gulf Bank (S.A.E), represented in the separate balance sheet as of 31 December 2016, and the related separate statements of income, change in equity and cash flows for the year then ended, and a summary of significant accounting policies and other notes.

Management's Responsibility for the Financial Statements

These financial statements are the responsibility of the Bank's management, as management is responsible for the preparation and fair presentation of the financial statements in accordance with the Central Bank of Egypt's rules relating to the preparation and presentation of the financial statements and measurement and recognition bases approved by its Board of Directors on 16 December 2008 and in light of the prevailing Egyptian laws and regulations. Management responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. This responsibility also includes selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Egyptian Standards on Auditing and in light of the prevailing Egyptian laws. Those standards require that we plan and perform the audit to obtain reasonable assurance that the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements, The procedures selected depend on the auditor's judgment including the assessment of the risks of material misstatement of the financial statements whether due to fraud or error, In making those risk assessments the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the bank's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on financial statements.

Opinion

In our opinion, the separate financial statements referred to above, give a true and fair view, in all material respects of the separate balance sheet of the Bank as of 31 December 2016, and of its separate financial performance and its separate cash flows for the year then ended in accordance with the Central Bank of Egypt's rules relating to the preparation and presentation of bank's financial statements and measurement and recognition bases approved by its Board of Directors on 16 December 2008 and the related applicable Egyptian laws and regulations relating to the preparation of those financial statements.

Report on Other Legal and Regulatory Requirements

Nothing came to our attention during the year ended 31 December 2016, that the bank was not in compliance with the laws and regulations of the Central Bank of Egypt, and the Banking and Monetary System no. 88 of 2003.

The Bank maintains proper accounting records that comply with the laws and the Bank's articles of association and the financial statements agree with the Bank's records.

The financial information included in the Board of Directors' Report, prepared in accordance with Law no. 159 of 1981 and its executive regulation, is in agreement with the books of the Bank insofar as such information is recorded therein.

The Retained earnings includes amount of 219,427,999 EGP (The retained earnings according to earnings distribution for 2015 which was approved by the bank's General assembly meeting dated on the 23rd of March 2016).

Based on the extraordinary and general assembly meeting which was held on the 23rd of March 2016 that authorize the delegation for the board of directors to proceed the required procedures for capital increase (free shares) financed by the retained earnings which represents amount of 219,427,999 EGP.

The board of directors meeting which was held on the 24th of January 2017 approved the disclosure statement in accordance to article (48) Egyptian stock exchange market rules for securities registration in the process of capital increase procedures as referred above.

1.General information

Egyptian Gulf Bank provides corporate, retail banking and investment banking services in various areas of Egypt through thirty four branches, and employs over 1,528 employees as of the balance sheet date.

Egyptian Gulf Bank S.A.E was under the minister decree No, 296 at 14 October 1981 according to the Investment Law No, 43 for 1974, That was replaced by investment law No, 230 for the 1989 that was canceled by law No, 8 for 1997 which is concerned for issuance of warranties and bonus of investment and it executives, The Bank is listed in the Egyptian Stock Exchange.

The board of directors approved the separate financial statements for the ended financial year 2016 at its which was held on the 24th of January 2017.

2.Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below; these policies have been consistently applied to all the years presented, unless otherwise stated.

2. A Basis of preparation

The separate financial statements have been prepared in accordance with Egyptian Financial Reporting Standards issued in 2006 and its amendments and in accordance with the Central Bank of Egypt regulations approved by the Board of Directors on December 16, 2008.

The separate financial statements have been prepared under the historical cost convention , As modified by the revaluation of financial assets and liabilities classified as trading or held at fair value through profit or loss, available for sale investment and all derivatives contracts.

2. B Subsidiaries and Associates

(B/1) Subsidiaries:

Subsidiaries are all entities (including Special Purpose Entities / SPEs) over which the Bank has owned directly or indirectly the control to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights, The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Bank has the ability to control the entity or not.

(B/2) Associates:

Associates are all entities over which the bank has significant influence but do not reach to the extent of control, generally accompanying a shareholding between 20% and 50% of the voting rights.

The acquisition method of accounting is used to account for the purchase of subsidiaries, The cost of an acquisition is measured at the fair value of the assets given, Equity instruments issued and liabilities incurred or assumed, plus any costs directly related to the acquisition, The excess of the cost of an acquisition over the bank share of the fair value of the identifiable net assets acquired is recorded as goodwill, A gain on acquisition is recognized in profit or loss if there is an excess of the bank's share of the fair value of the identifiable net assets acquired over the cost of the acquisition.

The cost method is applied to account for investments in subsidiaries and associates, whereby, investments are recorded based on the acquisition cost including any goodwill, deducting any impairment losses, and dividends are recorded in the income statement in the adoption of the distribution of these profit and evidence of the bank right to collect them.

2. C Segment reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments, A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and returns different from those of segments operating in other economic environments.

2. Summary of significant accounting policies – continued

2. D Foreign currency translation

(D/1) Functional and presentation currency:

The financial statements are presented in Egyptian pound, which is the Bank's functional and presentation currency.

(D/2) Transactions and balances in foreign currencies:

The bank maintains its accounting records in Egyptian pound, Transactions in foreign currencies during the financial year are translated into Egyptian pound using the prevailing exchange rates on the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the end of the financial year at the prevailing exchange rates, Foreign exchange gains and losses resulting from settlement and translation of such transactions and balances are recognized in the income statement and reported under the following line items.

- Net trading income from held-for-trading assets and liabilities.
- Other operating revenues (expenses) from the remaining assets and liabilities.

Changes in the fair value of investments in debt instruments; which represent monetary financial instruments, denominated in foreign currencies and classified as available for sale assets are analyzed into valuation differences resulting from changes in the amortized cost of the instrument, differences resulting from changes in the applicable exchange rates and differences resulting from changes in the fair value, of the instruments.

Valuation differences resulting from changes in the amortized cost are recognized and reported in the income statement in income from loans and similar revenues' whereas difference resulting from changes in foreign exchange rates are recognized and reported in 'other operating revenues (expenses)', The remaining differences resulting from changes in fair value are deferred in equity and accumulated in the 'Revaluation reserve of available-for-sale investments'.

Valuation differences resulting from the non-monetary items include gains and losses of the change in fair value of such equity instruments held at fair value through profit and loss, as for recognition of the differences of valuation resulting from equity instruments classified as financial investments available for sale within the fair value reserve in equity.

2. E Financial assets

The Bank classifies its financial assets in the following categories:

- Financial assets designated at fair value through profit or loss.
- Loans and receivables.
- Held to maturity investments.
- Available for sale financial investments.
- Management determines the classification of its investments at initial recognition.

(E/1) Financial assets at fair value through profit or loss:

This category has two sub-categories:

- Financial assets held for trading.
- Financial assets designated at fair value through profit and loss at inception.

A financial asset is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the short term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit making.

The Bank in all conditions doesn't reclassify any financial instrument moving to programs of financial instruments reclassified with fair value from statement of income or to financial assets program for trading.

2. Summary of significant accounting policies – continued

(E/2) Loans and advances

Loans and advances are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- Assets which the bank intends to sell immediately or in the short term, which is classified as held for trading, or those that the bank upon initial recognition designates as at fair value through profit and loss.
- Assets classified as Available-for-sale at initial recognition.
- Assets for which the holder may not recover substantially all of its initial investment, other than credit deterioration.

(E/3) Held to maturity financial investments:

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Bank's management has the positive intention and ability to hold till maturity, If the Bank has to sell other than an insignificant amount of held- to-maturity assets, the entire category would be reclassified as available for sale unless in necessary cases subject to regulatory approval.

(E/4) Available for sale financial investments:

Available-for-sale investments are those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

The following are applied in respect to all financial assets:

Debt securities and equity shares intended to be held on a continuing basis, other than those designated at fair value, are classified as available-for-sale or held-to-maturity, Financial investments are recognized on trade date, when the group enters into contractual arrangements with counterparties to purchase securities.

Financial assets are initially recognized at fair value plus transaction cost for all financial assets not carried at fair value through profit and loss, Financial assets carried at fair value through profit and loss are initially recognized at fair value, and transaction costs are expensed in the income statement.

Financial assets are derecognized when the rights to receive cash flows from the Financial assets have expired or when the Bank transfer substantially all risks and rewards of the ownership, Financial liabilities are derecognized when they are extinguished, that is, when the obligation is discharged or cancelled or expired.

Available- for- sale, held-for-trading and financial assets designated at fair value through profit and loss are subsequently measured at fair value, Loans, receivable and held-to-maturity investments are subsequently measured amortized cost.

Gains and losses arising from changes in the fair value of the 'financial assets designated at fair value through profit or loss are recognized in the income statement in 'net income from financial instrument designated at fair value 'gains and losses arising from changes in the fair value of available for sale investments are recognized directly in equity, until the financial assets are either sold or become impaired, When available-for-sale financial assets are sold, the cumulative gain or loss previously recognized in equity is recognized in profit or loss

Interest income is recognized on available for sale debt securities using the effective interest method, calculated over the asset's expected life, Premiums and discounts arising on the purchases are included in the calculation of effective interest rates, Dividends are recognized in the income statement when the right to receive payment has been established.

2. Summary of significant accounting policies – continued

The fair values of quoted investments in active markets are based on current bid prices, If there is no active market for a financial asset, or no current demand prices available, the Bank measures fair value using valuation models, These include the use of recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation models commonly used by market participants, if the Bank has not been able to estimate the fair value of equity instruments classified available for sale, value is measured at cost less any impairment in value.

Available for sale investments that would have met the definition of loans and receivable at initial recognition may be reclassified out to loans and advances or financial assets held to maturity, in all cases, when the bank has the intent and ability to hold these financial assets in the foreseeable future or till maturity , The financial assets in reclassified at its fair value on the date of reclassification, and any profits or losses that have been recognized previously in equity, are treated based on the following:

- If the Financial asset has fixed maturity, gains or losses are amortized over the remaining life of the investment using the effective interest rate method, In case of subsequent impairment of the financial asset, the previously recognized unrealized gains or losses in equity are recognized directly in the profits and losses.

- In the case of financial asset which has infinite life, any previously recognized profit and loss in equity will remain until the sale of the asset or its disposal, in the case of impairment of the value of the financial asset after the re-classification, any gain or loss previously recognized in equity is recycled to the profits and losses.

- If the bank adjusts its estimates of payments or receipts of a financial asset that in return adjust the carrying amount of the asset [or group of financial assets] to reflect the actual cash inflows, the carrying value is recalculated based on the present value of estimated future cash flows at the effective yield of the financial instrument and the difference are recognized in Profit and loss.

- In all cases, if the bank re-classified financial assets in accordance with the above criteria and increases its estimate of the proceeds of future cash flow, this increase adjusts the effective interest rate of this asset only without affecting the investment book value.

2. F Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a legally enforceable right to offset the recognized amounts and there is an intention to be settled on a net basis, or realize the asset and settle the liability simultaneously.

2. Summary of significant accounting policies – continued

2. G Interest income and expense

Interest income and expense for all financial instruments except for those classified as held-for-trading or designated at fair value are recognized in "Interest income" and "Interest expense" in the income statement using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant year, The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate a shorter period to the net carrying amount of the financial asset or financial liability, When calculating the effective interest rate, the Bank estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses, The calculation includes all fees and points paid or received between parties of the contract that represent an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once loans or debts are classified as non-performing or impaired, the revenue of interest income will not be recognized and will be recorded off balance sheet, and are recognized as income subsequently based on a cash basis according to the following:

- When all arrears are collected for consumer loans, personal mortgage and micro-finance loans.
- When calculated interest For corporate are capitalized according to the rescheduling agreement condition until paying 25 % from rescheduled payments for a minimum performing period of one year, if the customer continues to perform, the calculated interest will be recognized in interest income [interest on the performing rescheduling agreement balance] without the marginalized before the rescheduling agreement which will be recognized in interest income after the settlement of the outstanding loan balance.

2. H Fees and commission income

Fees charged for servicing a loan or facility that is measured at amortized cost, are recognized as revenue as the service is provided fees and commissions on non-performing or impaired loans or receivable cease to be recognized as income and are rather recorded off balance sheet, These are recognized as revenue, on a cash basis, only when interest income on those loans is recognized in profit and loss, at that time, fees and commissions that present an integral part of the effective interest rate of a financial asset, are treated as an adjustment to the effective interest rate of the financial asset.

2. Summary of significant accounting policies – continued

Commitment fees and related direct costs for loans and advances where draw down is probable are deferred and recognized as an adjustment to the effective interest on the loans drawn, Commitment fees in relation to facilities where draw down is not probable are recognized at the maturity of the term of the Commitment.

Fees are recognized on the debt instruments that are measured at fair value through profit and loss on initial recognition and syndicated loan fees received by the bank are recognized when the syndication has been completed and the bank does not hold any portion of it or holds a part at the same effective interest rate used for the other participants portions.

Commission and fees arising from negotiation, or participating in the negotiation of a transaction for a third party such as the arrangement of the acquisition of shares of other securities and the purchase or sale of properties are recognized upon completion of the underlying transaction in the income statement.

Other management advisory and service fees are recognized based on the applicable service contracts, usually on accrual basis, Financial planning fees related to investment funds are recognized steadily over the period in which the service is provided the same principle is applied for wealth management; financial planning and custody services that are provided on the long term are recognized on the accrual basis also.

2. I Dividend income
Dividends are recognized in the income statement when the right to collect it is declared.

2. J sale and repurchase agreements

Securities may be lent or sold according to commitment to repurchase (repos) are reclassified in the financial statement and deducted from Treasury Bills balance, Securities borrowed or purchased according to a commitment to resell them (reverse repos) are reclassified in the financial statement and added to treasury bills balance, The difference between sale and repurchase price is treated as interest and accrued over the life of the agreement using the effective interest rate method.

2. K Impairment of financial assets
(K/1) Financial assets carried at amortized cost:
The bank assesses on each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired, a financial asset or group of financial assets is impaired only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event/s") and that a loss event/s has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The criteria that the bank uses to determine that there is objective evidence of an impairment loss include:
- Great financial troubles facing the borrower or debtor.
- Violation of the conditions of the loan agreement such as non-payment.
- Initial bankruptcy proceeding.
- Deterioration of the borrower's competitive position.
- The bank for reasons of economic or legal financial difficult of the borrower by Granting concessions may not agree with the bank granted in normal circumstance.
- Impairment of guarantee.
- Deterioration of credit worthiness.

The objective evidence of impairment loss for group of financial assets is observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio, for instance an increase in the default rates for a particular banking product.

The bank estimates the period between a losses occurring and its identification for each specific portfolio, In general, the periods used vary between three months to twelve months.

2. Summary of significant accounting policies – continued

The bank first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant and in this field the following are considered:

- If the bank determines that no objective evidence of impairment exists for an individually assessed financial assets, whether significant or not, It includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment according to historical default ratios.
- If the bank determines that an objective evidence of financial assets impairment exists that is individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.
- If the result of a previous test did not recognize impairment loss, then this asset will be added to the group of financial assets that are collectively evaluated for impairment.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate, The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the income statement, If a loan or held to maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract when there is objective evidence for asset impairment, As a practical expedient, the bank may measure impairment on the basis of an instrument's fair value using an observable market price.

The calculation of the present value of the estimated future cash flows of collateralized financial asset reflect the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics(i.e., on the basis of the group's grading process that consider asset type, industry, geographical location, collateral type, past-due status and other relevant factors), Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

For the purposes of evaluation of impairment for a group of financial assets according to historical default ratios future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flow of the assets in the Bank and historical loss experience for assets with credit risk characteristics similar to those in the bank, Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current condition that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist.

Estimates of changes in future cash flows for groups of assets should be reflected together with changes in related observable data from period to period (e.g., changes in unemployment rates, property prices, payment status, or other indicative factors of changes in the probability of losses in the bank and their magnitude),the methodology and assumptions used for estimating future cash flows are reviewed regularly by the bank.

(K/2) Available for sale investments:

The bank assesses on each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets classify under available for sale is impaired, In the case of equity investments classified as available for sale, a significant or a prolonged decline in the fair value of the security below its cost is considered in determining

whether the assets are impaired, the decrease consider significant when it became 10% from the book value of the financial instrument and the decrease consider to be extended if it continues for period more than 9 months, and if the mentioned evidence become available then any cumulative gains or losses previously recognized in equity are recognized in the income statement, in respect of available for sale equity securities, impairment losses previously recognized in profit and loss are not reversed through the income statement.

2. Summary of significant accounting policies – continued

2. L Intangible assets:

(L/1) Software (computer programs)

Expenditures related to the development or maintenance of computer programs, are to be charged on income statement, as incurred, Expenditures connected directly with specific software and which are subject to the Bank's control and expected to produce future economic benefits exceeding their cost for more than one year, are to be recognized as an intangible asset, The expenses include staff cost of the team involved in software upgrading, in addition to a portion of overhead expenses.

The expenditures that lead to the development of computer software beyond their original specifications are recognized as an upgrading cost and are added to the original software cost.

The computer software cost is recognized as an asset that is amortized over the expected useful life time not exceeding four years, except for the main software for the bank that is amortized over 10 years.

2. M Other assets:

Non-current Assets held for Sale

Non-current assets are classified as non-current assets held for sale if it is expected to recover their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This includes assets bought for loans settlement, fixed assets which the bank suspends their use to sell it, and the subsidiaries and associates companies which the bank buy for the purpose of selling them.

The asset (or disposal group) must be available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets.

The asset (or disposal group) that is classified as assets held for sale based on the book value in the classification date, or the fair value deducting the sale costs whichever is less.

If the bank changes the sale plan, the book value of the asset will be modified to the amount by which the asset would have been measured in case it was not classified as an asset held for sale taking into consideration any value decline.
As for assets gained against loans settlement, if the bank fails to sell them within the legally set period, the bank should form 10% from the asset value annually as a general bank risk reserve

The changes in the value of non-current assets held for sale, the profit and loss of sale shall be acknowledged in the item other operating revenues (expenses).

2. Summary of significant accounting policies – continued

2. N Fixed assets:
Land and buildings comprise mainly branches and offices, all property, plant and equipment are stated at historical cost less depreciation and impairment losses, Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or as a separate asset, as appropriate, only when it is probable that future economic benefits will flow to the bank and the cost of the item can be measured reliably, All other repairs and Maintenance are charged to other operating expenses during the financial period in which they are incurred.

Land is not depreciated; Depreciation of other assets is calculated using the straight-line method to allocate their residual values over estimated useful lives, as follows:

Buildings	40 years
Safes	40 years
Office Furniture	10 years
Typewriters, calculators And air conditions	8 years`
Computers and core systems	5 years
Fixtures and fitting	5 years
Transportation	4 years
Computer software's	4 years

The assets residual values and useful lives are reviewed, and adjusted if appropriate, On each balance sheet date, Depreciable Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recovered, An asset's carrying amount is written down immediately to its recoverable value if the asset's carrying amount exceeds its estimated recoverable amount, The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Gains and losses on disposals are determined by comparing the selling proceeds with asset carrying amount and charge to other operating expenses in the income statement.

2. O Impairment of non-financial assets
Assets that have an indefinite useful life are not amortized-expect goodwill- and are tested annually for impairment, Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstance indicate that the carrying amount may not be recoverable, an impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount.

The recoverable amount is the higher of an asset's fair value less costs to sell or value in use, Assets are tested for impairment with reference to the lowest level of cash generating unit(s), a previously recognized impairment loss relating to a fixed asset may be reversed in part or in full when a change in circumstance leads to a change in the estimates used to determine the fixed asset's recoverable amount, The carrying amount of the fixed asset will only be increased up to the amount that the original impairment not been recognized.

2. P Cash and cash equivalents
For the purposes of the cash flow statement, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash and non-restricted balances with central banks, treasury bills and other eligible bills, loans and advances to banks, amounts due from other banks and short-term government securities.

2. Summary of significant accounting policies – continued

2. Q Other provisions

Provisions for restructuring costs and legal claims are recognized when the Bank has present legal or constructive obligation as a result of past events; where it is more likely than not that a transfer of economic benefit will be necessary to settle the obligation, and it can be reliably estimated.

In case of similar obligations, the related cash outflow should be determined in order to settle these obligations as a group, The provision is recognized even in case of minor probability that cash outflow will occur for an item of these obligations.

When a provision is wholly or partially no longer required, it is reversed through profit or loss under other operating income (expense),

Provisions for obligations, order than those for credit risk or employee benefits, due within more than 12 month from the balance sheet date are recognized based on the present value of the best estimate of the consideration required to settle the present obligation on the balance sheet date, An appropriate pretax discount rate that reflects the time value of money is used to calculate the present value of such provisions, For obligations due within less than twelve months from the balance sheet date, provision are calculated based on undiscounted expected cash outflows unless the time value of money has significant impact on the amount of provision, then it is measured at the present value.

2. R Employee's benefits

(R/1) Social insurance

The bank contributes to the social insurance scheme related to the Social Insurance Authority for the benefit of its employees; the income statement is charged with these contributions on an accrual basis and is included in the employee's benefit account.

(R/2) Profit share

The Bank pay a percentage of the cash profits expected to be distributed as employee's profit share through item "dividends declared" in the owners' equity, and as liability when the its approved by the shareholders general assembly, There is no recorded liability for the employees share in the unpaid dividends portion.

(R/3) Other retirement liability

The bank provides healthcare benefits to retirees and usually the benefits are granted under the condition that the retiree has reached the retirement age when employed by the bank and completes the minimum required service period, the expected costs are accrued during the period of services rendered by the employee under the defined benefit plans accounting method.

2. S Income tax

Income tax on the profit and loss for the year and deferred tax are recognized in the income statement except for income tax relating to items of equity that are recognized directly in equity.

The income tax is recognized based on net taxable profit using the tax rates applicable on the date of the balance sheet in addition to tax adjustments for previous years.

Deferred taxes arising from temporary time differences between the book value of assets and liabilities are recognized in accordance with the principles of accounting and value according to the foundation of the tax, this is determining the value of deferred tax on the expected manner to realize or settle the values of assets and liabilities, using tax rates applicable on the date of the balance sheet.

Deferred taxes assets of the bank recognized when there is likely to be possible to achieve profits subject to tax in the future to be possible through to use that asset, And is reducing the value of deferred tax assets with part of that will come from tax benefit expected during the following years that in the case of expected high benefit tax, Deferred tax assets will increase within the limits of the above reduced.

2. T Capital

(T/1) Dividends

Dividends on ordinary shares and profit sharing are recognized as a charge of equity upon the general assembly approval, Profit sharing include the employee' Profit share and the board of director' remuneration as prescribed by the bank's articles of incorporation and the corporate law.

3.Financial risk management

The bank's activities expose it to variety financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks, Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business, The bank's aim is therefore to achieve an appropriate balance between risk and rewards and minimize potential adverse effect on the Bank's financial performance, The most important types of financial risks are credit risk, market risk, liquidity risk and other operating risks, Also market risk includes exchange rate risk, rate of return risk and other prices risks.

The bank's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems, The bank regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

Risk management is carried out by risk department under policies approved by the Board of Directors; Bank treasury identifies, evaluates and hedges financial risks in close co-operation with the bank's operating units.

The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non–derivative financial instruments; In addition, credit risk management is responsible for the independent review of risk management and control environment.

3. A Credit risk

The Bank takes on exposure to credit risk, which is the risk that counterparty will cause a financial loss for the bank by failing to discharge an obligation, Management therefore carefully manages its exposure to credit risk, Credit exposures arise principally in loans and advances, dept., securities and other bills, There is also credit risk in off-balance sheet financial arrangement such as loan commitments, The credit risk management and control are centralized in a credit risk Management team in bank treasury and reported to the Board of Directors and Heads of each business unit regular.

(A/1) Credit risk measurement

Loans and advances to banks and customers

In measuring credit risk of Loans and facilities to banks and customers at counterparty level, the bank reflect three components.

- The 'probability of default' by the client or counterparty on its contractual obligation.
- Current exposures to the counterparty and its likely future development, from which the bank derive the 'exposure at default'; and
- The likely recovery ratio on the defaulted obligation (the 'loss given default)

3. Financial risk management - continued

These credit risk measurements, which reflect expected loss (the 'expected loss model') are required by the Basel committee on banking regulations and the supervisory practices (the Basel committee), and are embedded in the bank's daily operational management, The operational measurements can be contrasted with impairment allowance required under EAS 26, which are based on losses that have been incurred on the balance sheet data (the 'incurred loss model') rather than expected losses (note 3.A)

The bank assesses the probability of default of individual counterparties using internal rating tools tailored to the various categories of counterparty, They have been developed internally and combine statistical analysis with credit officer judgment and are validated, where appropriate, Clients of the bank are segmented into four rating classes, The bank's rating scale, which is shown below, reflects the range of default probabilities defined for each rating class, This means that; in principle, exposures migrate between classes as the assessment of their probability of default changes, The rating tools are kept under review and upgraded as necessary, The bank regularly validates the performance of the rating and their predictive power with regard to default events.

Bank's internal ratings scale

Description of the grade	Bank's rating
Performing loans	1
Regular watching	2
Watch list	3
Non-performing loans	4

The amount of default represent the outstanding balances at the time when a late settlement occurred for example the loans expected amount of default represent its book value, For commitments the default amount represents all actual withdrawals in addition to any withdrawals that occurred till the date of the late payment if any.

Loss given default or loss severity represents the bank expectation of the extent of loss on a claim should default occur, It is expressed as percentage loss per unit of exposure and typically varies by type of counterparty, type and seniority of claim and availability of collateral or other credit mitigation.

Debt instruments, treasury bills and other bills:
For Debt instruments and bills external rating such as standard and poor's rating or their equivalents are used for managing of the credit risk exposures, and if this rating is not available, then other ways similar to those used with the credit customers are uses, The investments in those securities and bills are viewed as a way to gain a better credit quality mapping and maintain a readily available source to meet the funding requirement at the same time.

(A/2) Risk Limit and mitigation policies
The Bank manages, Limit and controls concentrations of credit risk wherever they are identified – in particular, to individual counterparties and banks, and to industries and countries.

The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industry segments, Such risks are monitored on revolving basis and subject to an annual or more frequent review, when considered necessary, Limits on the level of credit risk by individual, counterparties, product, and industry sector and by country are approved quarterly by the board of directors

The exposure to any one borrower including banks and brokers is further restricted by sub-limits covering on-and off-balance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts, Actual exposures against limits are monitored daily.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate.

3. Financial risk management - continued

Some other specific control and mitigation measures are outlined below:

Collaterals:
The Bank sets a range of policies and practices to mitigate credit risk, The most traditional of these is the taking of security for funds advances, which is common practice, The bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation, The principal collateral types for loans and advances are:

- Mortgages over residential properties.
- Mortgages Business assets such as machines and inventory.
- Mortgages financial instruments such as debt securities and equities.

Longer-term finance and lending to corporate entities are generally secured; revolving individual credit facilities are generally unsecured, In addition, in order to minimize the credit loss the bank will seek additional collaterals from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances are determined by the nature of the instrument, debt securities, treasury and other governmental securities are generally unsecured, with the exception of asset-backed securities and similar instruments, which are secured by portfolios of financial instruments.

Master netting arrangements
The Bank further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions, Master netting arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on gross basis, However, the credit risk associated with favorable contracts is reduced by a master netting arrangement to the extent that if a default occurs, all amounts with the counterparty are terminated and settled on a net basis, The bank overall exposure to credit risk on derivative instruments subject to master netting arrangements can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

Credit related commitments
The primary purpose of these instruments is to ensure that funds are available to a customer as required, Guarantees and standby letters of credit carry the same credit risk as loans, Documentary and commercial letters of credit - which are written undertakings by the bank on behalf of a customer authorizing a third party to draw drafts on the bank up to a stipulated amount under specific terms and condition – are collateralized by underlying shipments of goods to which they relate and therefore carry less risk than a direct loan.
Commitments to extend credit represent unused portion of authorizations to extend credit in the form of loans, guarantees or letters of credit, With respect to credit risk on commitments to extend credit, the bank is potentially exposed to loss in an amount equal to the total unused commitments, However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards, The Bank monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

3. Financial risk management - continued

3.(A/3) Impairment and provisioning policies

The internal rating systems focus more on credit-quality at the inception of lending and investment activities, Otherwise, impairment provisions recognized at the balance sheet date for financial reporting purposes impairment losses that have been incurred and based on objective evidence of impairment as will be mentioned below, Due to the different methodologies applied, the amounts of incurred credit losses charged to the financial statements are usually lower than the expected amount determined from the expected loss models used.

The impairment provision reported in the balance sheet at the end of the period is derived from the four internal rating grades; however, the majority of the impairment provision comes from the last two ratings.
The table below shows the percentage of in-balance sheet items relating to loans and advances and the related impairment provision for each rating:

Bank's rating	**31 December 2016**		31 December 2015	
	Loans and advances	**Impairment provision**	Loans and advances	Impairment provision
	%	%	%	%
Performing loans	**44.27%**	**2.15%**	52.64%	6.58%
Regular watching	**47.71%**	**25.50%**	35.25%	12.43%
Watch list	**5.83%**	**9.15%**	6.78%	12.81%
Non – performing loans	**2.19%**	**63.20%**	5.33%	68.18%
	100%	**100%**	100%	100%

The internal rating tools assists management to determine whether objective evidence of impairment exists under EAS 26, based on the following criteria set out by the Bank:

- Cash flow difficulties experienced by the borrower or debtor
- Breach of loan covenants or conditions
- Initiation of bankruptcy proceedings
- Deterioration of the borrower's competitive position.
- Bank granted concessions may not be approved under normal circumstances due to economic, legal reasons and financial difficulties facing the borrower.
- Deterioration of the collateral value.
- Deterioration of the credit situation.

The Bank's policy requires the review of all financial assets that are above materiality thresholds at least annually or more regularly when circumstances require, impairment provision on individually assessed accounts are determined by an evaluation of the incurred loss at balance-sheet date, and are applied to all significant accounts individually, The assessment normally encompasses collateral held (including re-confirmation of its enforceability) and the anticipated receipt for that individual account, Collective Impairment provisions are provided portfolios of homogenous assets by using the available historical loss experience, experienced judgment and statistical techniques.

3. Financial risk management – continued

3.(A/4) Pattern of measure the general banking risk

In addition to the four categories of the bank's internal credit rating indicated in note (A/1) management classifies loans and advances based on more detailed subgroups in accordance with the CBE regulations, Assets exposed to credit risk in these categories are classified according to detailed rules and terms depending heavily on information relevant to the customer, his activity, financial position and his repayment track record, The Bank calculates required provisions for impairment of assets exposed to credit risk, including commitments relating to credit on the basis of rates determined by CBE, In case, the provision required for impairment losses as per CBE credit worthiness rules exceeds the required provision by the application used in balance sheet preparation in accordance with Egyptian Accounting Standards, that excess shall be debited to retained earnings and carried to the "general banking risk reserve" in the equity section, Such reserve is always adjusted, on a regular basis, by any increase or decrease so, that reserve shall always be equivalent to the amount of increase between the two provisions, Such reserve is not available for distribution.

3. Financial risk management – continued

CBE rating	Categorization	Provision %	Internal rating	Categorization
1	Low risk	0	1	Performing loans
2	Average risk	1%	1	Performing loans
3	Satisfactory risk	1%	1	Performing loans
4	Reasonable risk	2%	2	Regular watching
5	Acceptable risk	2%	2	Regular watching
6	Marginally Acceptable risk	3%	3	Watch list
7	Watch list	5%	3	Watch list
8	Substandard	20%	4	Non – performing loans
9	Doubtful	50%	4	Non – performing loans
10	Bad debts	100%	4	Non – performing loans

3. B Market risk

The Bank is exposed to market risks of the fair value or future cash flow fluctuation resulting from changes in market prices, Market risks arise from open market related to interest rate, currency, and equity products represented in each of which is exposed to general and specific market movements and changes in sensitivity levels of market rates or prices such as interest rates, foreign exchange rates and equity instrument prices, The Bank divides its exposure to market risk into trading and non-trading portfolios.

Bank treasury is responsible for managing the market risks arising from trading and non-trading activities which are monitored by two separate teams, Regular reports are submitted to the Board of Directors and each business unit head, Trading portfolios include transactions where the Bank deals direct with clients or with the market; Non-trading portfolios primarily arise from managing prices assets and liabilities interest rate relating to retail transactions, Non-trading portfolios also includes foreign exchange risk and equity instruments risks arising from the Bank's held-to-maturity and available-for-sale investments.

(B/1) Market risk measurement techniques

As part of market risk management the Bank undertakes various hedging strategies and enters into swaps to match the interest rate risk associated with the fixed-rate long-term loans if the fair value option has been applied, The major measurement techniques used to control market risk are outlined below:

Stress Testing

Stress testing provides an indicator of the expected losses that may arise from sharp adverse circumstances, Stress testing is designed to match business using standard analysis for specific scenarios, The stress testing is carried out by the Bank treasury and includes risk factor stress testing where sharp movements are applied to each risk category and test emerging market stress, as emerging market are subject to sharp movements; and subject to special stress testing including possible events effect specific positions or regions – for example the stress outcome to a region applying a free currency rate, The results of the stress testing are reviewed by Top Management and the Board of Directors.

3. Financial risk management – continued

(B/2) Foreign exchange volatility risk

The Bank is exposed to foreign exchange volatility risk in terms of the financial position and cash flows, The Board of Directors set aggregate limits for foreign exchange for each position at the end of the day, and during the day which is controlled on timely basis, The following table summarizes the Bank' exposure to foreign exchange volatility risk at the end of the financial year and includes the carrying amounts of the financial instruments in currencies:

3. Financial risk management – continued

(B/3) Interest rate risk

The Bank is exposed to the effect of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Cash flow interest rate risk is the risk of fluctuation in future cash flows of a financial instrument due to changes in market interest rates. Fair value interest rate risk is the risk whereby the value of a financial instrument fluctuates because of changes in market interest rates, Interest margins may increase as a result of such changes but profit may decrease in the event that unexpected movements arise. The Board sets limits on the level of mismatch of interest rate reprising that may be undertaken and is monitored daily by Bank Treasury.

The table below summarizes the Bank's exposure to interest rate risks. It includes the Bank's financial instruments at carrying amounts categorized by the earlier of reprising or maturity dates.

3. C Liquidity risk

Liquidity risk represents difficulty encountering the Bank in meeting its financial commitments when they fall due or to replace funds when they are withdrawn, This may result in failure in fulfilling the Bank's obligation to repay to the depositors and fulfilling lending commitments.

Liquidity risk management

The Bank's liquidity management process carried out by the Bank Treasury includes:

- Daily funding is managed by monitoring future cash flows to ensure that all requirements can be met, this includes availability of liquidity when due or borrowed by customers, to ensure that the Bank reaches its objective it maintains an active presence in global money markets.
- The Bank maintains a portfolio of highly marketable that, are assumed to be easily liquidated in the event of an unforeseen interruption of cash flow.
- Monitoring liquidity ratios are according to internal requirements and Central Bank of Egypt requirements, Managing loans concentration and dues.

For monitoring and reporting purposes, the Bank calculates the expected cash flow and liquidity are expected and monitored on the next day, week and month basis, which are the main times to manage liquidity the starting point to calculate these expectations is through analyzing the financial liabilities dues and expected financial assets collections.

Credit risk department monitor's the mismatch between medium term assets, the level and nature of unused loans limits, overdraft utilizations, and the effect of contingent liabilities such as letters of guarantees and letters of credit.

3.Financial risk management – continued

Funding approach
Sources of liquidity are regularly reviewed by separate team in the bank to maintain a wide diversification according to currency. Geographic, sources, products and terms.

3. Financial risk management – continued

Assets available to meet all liabilities and cover loan commitments include cash, balances with Central Banks, balances due from Banks, treasury bills and other governmental notes, and Loans and credit facilities to Banks and clients. Maturity term of percentage of loans to clients that are maturing within a year is extended in the normal course of the bank's business. Moreover, some debt instruments, treasury bills and other governmental notes are pledged to cover liabilities. The Bank has the ability to meet unexpected net cash flows through selling securities, and finding other financing sources.

3. D Fair value of financial assets and liabilities

(D/1) Financial instruments not measured at fair value,

The table below summarizes the carrying amounts and fair values for those financial assets and liabilities not presented on the Bank's balance sheet at their fair value.

	Book value		*FMV

* Some assets and liabilities were not measured at their FMV

Due from banks

Fair value of placements and deposits bearing variable interest rate for one day is its current value, the expected fair value for deposits bearing variable interest is based on the discounted cash flow using rate of similar loans of similar credit risk and due dates.

Loans and advances to banks

Loans and advances to banks are represented in loans other than deposits hold in banks, Fair value expected for loans and advances represents the discounted value of future cash flows expected to be collected and cash flows are discounted using the current market interest rate to determine the fair value.

Loans and advances to customers

Loans and advances are net of provisions for impairment. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

3. Financial risk management – continued

Financial investments
Financial investments shown in the above schedule includes only held to maturity assets investments; as available for sale investments are measured at fair value except for equity instruments for which the market value can't be reliably determined, Fair value of held-to-maturity investments is based on market prices or broker prices, Fair value is estimated using quoted market prices for securities with similar credit and maturity and yield characteristics where information is not available.

Due to banks and customers
The estimated fair value of deposits of indefinite maturity which includes interest-free deposits is the amount paid on call.
The estimated fair value of fixed interest-bearing deposits and other loans not traded in an active market is based on discounted cash flows using interest rates for new debts of similar maturity dates.

Issued debt instrument
Total Fair value is calculated based on current financial markets' rates. As for securities that have no active market, discounted cash flows model is used in the first time according to the current rate applicable to the remaining period till maturity date.

Capital management
For capital management purpose, the bank's capital includes total equity as reported in the balance sheet plus some other elements that are managed as capital; the bank manages its capital to ensure that the following objectives are achieved:

- Compliance with the legally imposed capital requirement in Egypt.
- Protecting the bank's ability to continue as a going concern and enabling it to generate yield for shareholders and other parties dealing with the bank.
- Maintaining a strong capital base to enhance growth of the bank's operations.

Capital adequacy and the use of regulatory capital are monitored on a daily basis by the bank's management. Employing techniques based on the guidelines developed by the Basel committee as implemented by the banking supervision unit in the central bank of Egypt on a quarterly basis.
The CBE requires the bank to comply with the following:

- Maintaining EGP 500 million as a minimum requirement for the issued and paid-up capital.
- Maintaining a minimum level of capital adequacy ratio of 10%, calculated as the ratio between total value of the capital elements, and the risk weighted average of the bank's assets and contingent liabilities.

3. Financial risk management – continued

According to new instructions issued in 18 December 2012:

The numerator of the capital adequacy ratio consists of the following two tiers:

Tier One: consist of two parts which are continuous basic paid in capital and additional basic paid in capital.

Tier Two: is the supported paid in capital and consist of:

- 45% from positive foreign currencies translation reserve.
- 45% from special reserve.
- 45% from fair value increment over the book value for financial investments. (Positive portion only)
- 45% from fair value reserve balance for financial investment available for sale.
- 45% from fair value increment over the book value for financial investments held for maturity.
- 45% from fair value increment over the book value for financial investments in associates and subsidiaries.
- Financial instruments with embedded derivative.
- Loans (Supportive deposits with 20% amortization from its value each year from the last five years from its maturity).
- Impairment loss provision for loans, advances and performing contingent liabilities with maximum 1.25% from total weighted assets and weighted contingent liabilities.
- 50% disposals from tier 1 and 2.
- Assets reverted to the bank value in general banking risk reserve.

* For denominator of capital adequacy ratio consist of:

- Credit risk.
- Market risk.
- Operational risk

The assets to be averaged based on weighted risk ranging from zero to 100% classified as the nature of the Debit side for every asset that reflects the related credit risks and the cash guarantees to be considered.

The same treatment to be used for the amounts that excluded from the balance sheet after applying adjustments to reflect the nature of contingent and expected losses for these amounts.

3. Financial risk management – continued

The Table below summarize the composition of tier 1 and tier 2 and the capital adequacy ratio

Tier 1 capital	31/12/2016 In thousand EGP	31/12/2015 In thousand EGP
Issued and paid up capital	**1,567,132**	1,279,943
Legal reserve	**182,118**	114,306
Other reserves	**25,384**	22,857
Retained earnings (Retained losses)	**519,428**	8,141
Total deductions from tier 1 capital common equity	**(227,752)**	(140,421)
Total qualifying tier 1 capital	**2,066,310**	1,284,826
Tier 2 capital		
45% differences from foreign balances translation	**1,208**	1,208
45% of Special Reserve	**3,664**	3,664
45% of the increase in fair value than the book value for AFS if it (positive)	**3,669**	1,561
Impairment provision for loans and regular contingent liabilities	**241,139**	147,120
TOTAL (going – concern capital)	**--**	--
Total qualifying tier 2 capital	**249,680**	153,553
Total capital 1+2	**2,315,990**	1,438,379

Total Credit risk	**19,291,118**	11,769,611
Total Market risk	**90,871**	--
Total Operation risk	**1,485,643**	888,330
Total risk weighted assets and contingent liabilities	**20,867,632**	12,657,941
Capital adequacy ratio (%)	**11.098%**	11.36%

*The profit for the year added before the General Assembly approval.

3. E Leverage Financial Ratio:

Central Bank of Egypt Board of Directors had approved in its meeting held on July 7, 2015 on special supervisory instructions related to leverage ratio which maintain a minimum level of leverage ratio of 3% to be reported in quarterly basis as following:

-Guidance ratio starting from reporting period September 2015 till December 2017.

-Obligatory ratio started from year 2018.

This ratio will be included in Basel requirement tier 1 in order to maintain the Egyptian Banking System strong and safe, as long to keep up with the best international regulatory treatments.

Leverage financial ratio reflect relationship between tier 1 for capital that is used in capital adequacy ratio (After Exclusions) and other assets (on balance sheet and off-balance sheet) that are not risk weighted assets.

3. Financial risk management – continued

Ratio Elements:

1-The numerator elements:

The numerator consists of tier 1 for capital that is used in capital adequacy ratio (After Exclusions) in accordance with the requirements of the regulatory authority represented by the Central Bank of Egypt (CBE).

2-The denominator elements:

The denominator consists of all bank assets (on balance sheet and off-balance sheet) according to financial statements called "Bank exposure" which include total the following:

a-On the balance sheet exposure items after deducting some of tier 1 exclusions for capital base.

b-Derivatives contracts exposures.

c-Financing financial papers operations exposures.

The tables below summarize the leverage financial ratio (up to 2017):

	31 December 2016 EGP '000	31 December 2015 EGP '000
Tier 1 capital after exclusions (1)	**2,066,310**	1,284,826
Cash and due from Central Bank of Egypt (CBE)	**6,977,820**	4,936,386
Banks current accounts and deposits	**1,226,169**	1,790,444
Treasury bills	**8,751,811**	2,654,792
Financial investments held for trading	**--**	1,847
Financial investments available-for-sale	**1,956,375**	4,878,887
Financial investments held to maturity	**5,698,570**	12,515
Investments in subsidiaries and associates	**210,403**	220,203
Loans and credit facilities to customers	**19,503,624**	8,348,710
Fixed assets (Net of Accumulated depreciation & impairment loss Provisions)	**239,608**	80,528
Other assets	**1,160,503**	586,668
Deducted amounts from exposures (some of tier 1 exclusions for capital base)	**(166,960)**	(133,796)
Total on-balance sheet exposures, Derivatives contracts and financing	**45,557,923**	23,377,184
Import L/Cs	**76,477**	39,305
Export L/Gs	**6,285**	--
Letter of guarantee	**865,978**	478,747
L/Gs according to foreign banks	**23,966**	15,318
Bills of exchange	**31,491**	24,953
Total contingent liabilities	**1,004,193**	558,323
Capital commitments	**81,523**	47,988
Loan commitments to clients /banks (unutilized part) original maturity period:	**1,305,109**	412,275
Revocable without any conditions at any time by the bank and without past notifications, or include conditions for self-revocable because of downgrading credit risk rating for clients	**996,127**	271,448
Irrevocable to cancelation year to less	**67,222**	140,827
Irrevocable to cancelation more than one year	**241,760**	--
Total commitments	**1,386,632**	460,263
Total exposures off-balance sheet	**2,390,825**	1,018,586
Total exposures on-balance sheet and off-balance sheet (2)	**47,948,748**	24,395,770
Leverage financial ratio (1/2)	**4.31%**	5.27%

4.Significant accounting estimates and assumptions

The Bank makes subjective estimates and judgments that affect the reported amounts of assets and liabilities for the following financial year Consistent estimations and judgments are continually evaluated based on historical experience and other factors including the expectations of future events that are believed to be reasonable.

4. A Impairment losses for loans and advances

The Bank reviews the portfolio of loans and advance sat least quarterly to evaluate their impairment, The Bank uses discretionary judgment on determining whether it is necessary to record impairment loss in the income statement, The Bank has to identify if there is objective evidence indicating a decline in the expected future cash flows from loan portfolio before identifying any decline on individual basis, This evidence includes data indicating negative changes in a borrower's portfolio ability to repay to the Bank or local or economic circumstances related to default, On scheduling future cash flows the management uses the past experience to determine the credit impairment loss for assets when there is objective evidence of impairment similar to that of the portfolio in question, The methods and assumptions used in estimating both the amount and timing of the future cash flows are reviewed on a regular basis to minimize any discrepancy between the estimated loss and actual loss based on experience.

4. B Impairment of available for sale equity investments

The Bank recognizes impairment loss relating to available for sale equity investments when there is a significant or prolonged decline in the fair value below its cost, A judgment is required to determine that the decline is significant or prolonged, In making this judgment the Bank evaluates among other factors the volatility in share price, In addition, impairment loss is recognized when there is evidence of deterioration in the investee, financial position or operating /finance cash flow industry and sector performance technology changes.

Unrealized losses for available for sale investment amounted to 60,997,902 as a result of reevaluating prices declared in capital markets on 31 December 2016.

4 .C Held-to-maturity investments

Non-derivatives financial assets with fixed or determinable payments and fixed maturity are classified as held to maturity, This classification requires high degree of judgment; in return the bank tests the intent and ability to hold such investments to maturity, If the bank fails to hold such investments till maturity except for certain circumstances (selling an insignificant amount of held-to-maturity investments near to maturity date) then all held to maturity investment portfolio should be reclassified as available for sale which will be measured at fair value instead of amortized cost, In addition the Bank should suspend classifying investments as held to maturity caption.

If classification of investments as held to maturity is suspended the carrying amount shall increase by EGP 135,439,913 to reach its fair value by increasing the valuation reserve available for sale within the equity caption.

4 .D Income tax

The Bank is subject to income tax which requires the use of important estimates to calculate the income tax provision, There are a number of complicated processes and calculations to determine the final income tax, The Bank records a liability related to the tax inspection estimated results, According to estimates of probabilities of extra taxes ,when there is a difference between the final result of the actual tax inspection and the amounts previously recorded by the Bank such, differences affect the income and deferred tax provision at the year which the differences were noted.

5.By activity segment

Activity segment include operations and assets used in providing banking services and managing related risks and yields which may differ from other activities, the segmentation analyses of operations according to the Banking activities are as follows:

-Large enterprises medium and small ones

Activities include current accounts, deposits, overdrafts, loans, credit facilities and financial derivatives.

-Investments

Include merging of companies, purchase of investments, financing company's restructure and financial instruments.

-Individuals

Activities include current accounts, savings, deposits, credit cards, personal loans and mortgage loans.

-Other activities

Include other banking activities such as fund management.

6.Net interest income

	1,126,259,893	537,071,147

* Investments reverted to the bank represented in "Misr America" amounted to LE 41,140,937and "Hamenz Co" amounted to LE 12,000,000.

After the CBE board assembly on 8th of September, 2009 the following was stated:
"In the event that a bank that owns more than 40% of a non-financial company, said bank must dispose of any extra ownership within a year of acquiring the shares, Impairment loss of the shares accumulated will then be calculated according to accounting principles so as not to understate the value of these losses relative to any marginal increase above the 40%, Losses should then be reflected in the bank's income statement under investment losses, or as other expenses depending on the circumstances in exchange for a decrease in the book value of share price by the same amount, The CBE has opened an impairment account to each of the following: Misr America for medical supplies, and Hamenz."
